BIOPHARMACEUTICAL FACILITIES

With over 60 years of experience, TMC has specialized in supporting major aerospace and defense programs with complex vessels and is now ready to support biopharmaceutical manufacturing in compliance with required FDA standards and regulations. As mechanical contractors install and maintain HVAC, process piping, high purity water, and utility systems, TMC delivers specialized precision cleaning, passivation, and contamination control services that assure these critical systems meet and exceed ASME BPE standards, all while providing documentation for cGMP.

Let TMC handle the critical cleaning and contamination control work so you can focus on mechanical installations and project delivery. We help you meet deadlines, reduce risk, and deliver high quality systems.

CAPABILITIES & SERVICES

- Precision Cleaning and Passivation
- High Purity Process Piping Support & Tube Fabrication
- Cleanroom Component Processing & Oxygen Cleaning
- On-Site & Shop- Based Services
- Cleanliness Verification & Documentation Packages
- Technical Support for Mechanical Systems & Compliance

SBA SERVICE-DISABLED VETERAN-OWNED CERTIFIED · AS9100D CERTIFIED · ISO CERTIFIED · ITAR CERTIFIED COMPANY

TECHNICAL MICRONICS CONTROL (TMC) SERVICES

For nearly 60 years, TMC has delivered precision services across aerospace, defense, space, and industrial sectors. AS9100- and ISO 9001:2015-certified, we operate Class 7 and 8 cleanrooms for rental, certification, and consultation, and provide chemical cleaning, jet cleaning, passivation, testing, helium leak detection, electropolishing, and vacuum bake-out in-house or on-site. We also offer tube bending, fabrication, custom panels, and full machining and engineering support—including prototyping, modeling, reverse engineering, PCB design, system integration, and rapid prototyping. From our 7-acre campus, we serve NASA, the U.S. military, aerospace primes, spaceflight, research, and industry with turnkey precision solutions.

CLEANROOM

- Precision Cleaning
- Passivation
- Packaging & Assembly
- Vacuum Bakeout
- Chemical Etching
- Pressure Testing
- Hydrostatic & Pneumatic Testing
- Class 7 & Class 8 Cleanroom
